

J. Joachim lettre pour Jeff Porter
Il ne veut pas donner les bandes APEN à Bryan, alors Moi je
lui demande -- à suivre MORLAIX le 26 March 1976

Dear Jeff,

Thank you very much for your letter 12-3-76.

Don't apologise, because I understand very well you
can be busy, and, also, you were waiting for another
explanations I did not send you. All is o.k.

I am very happy that Antis & Victor has operated
on two occasions. It's a very good timing tool, and, when
you know how use it and when they are MANY PEOPLE
which have this tool in a ufo research ~~area~~ area, it's
possible to have many many good results. If I
did not send to you much informations, it's because the
man who has them did not send to me ---- So, I
give you the contact of this man, and I hope that now
He'll be able to send us this basic information -

Monsieur MICHEL MILLE Bat AC N° 202 KER HUEL
22 300 LANNION

* Mr. TOUGERON PAUL 57, rue Etienne DOLET
92 240 MALAKOFF

→ I'll see them to-morrow at the Matluzan Congress
and I'll speak about you and your electronics researches
It's very important to speak about you, because there are
many serious French ufologists Matluzan and I

want they know you and they contact you for
a good work in detection - I don't understand very
well about the little bead on the piece of wire at the
front right of the detector, But, I think it is the
Detector's memory, because, when you are not at home, and
when the detector "TILT" the little "Bead" goes down one
time, and, when you return, you know that the detector
"TILT" ~~losing your~~ "absence" - So, you must put the little
"Bead" up before using detector - You can add what you
WANT on the detector, because, if I send to you it is because
it's FOR you - I am very glad you enjoy it.

You propose me a help about my works, also, I know
you have APOX magnetic tapes, and, I'll very happy
if you want send me them - Because, in France, I
work with sociologists and we are very interesting in
study of the "Contacts" surrounding life phenomena
and also, life groups - if you want send me the tapes
you are a good fellow.

You want I write you how the french life scene started
in 1976 - I can say you this year will be a good year
for research in France among very various fields (technolo-
gies, medicals, psychics and parapsychics) and, after the
Franklinian meeting, I'll send you a rapport with many
details, So, you'll be able to see how we organise here
the Research in the various fields - Dear Jeff, receive
my very sincere Best Wishes and, I am waiting for
your letter and APOX TAPES THANKS your friend

MMJ
