Antony 28/8/76.

Dear Mr. Kaslof...

Mr Ravatin from the ARK'ALL FOUNDATION gave me  
a letter which you send to Mr Laforge.

I don't know all your work, and nothing ~~wh~~ about  
your explication with Laforge, excuse me, but some change have been made,  
inside the Foundation.

We, the DODECAEDRE group, are very interested on  
your work, and will be very happy if we can exchange some information.

I joint you the first issue of our publication  
ARK'ALL COMMUNICATION, please, excuse ours about the printing, we had have  
some problems with the editor, the next issue will be publish by Brest  
University Press Where we are professors on Electro acoustique music  
(Mlle Marie-Françoise Lepeltier), and myself at the Institute of AR GEO-  
Architecture at the same science university. I will send you the next issue  
which will be publish end October. In other way, we will be very happy  
to receive an exchange of your publications.

For us is very important if you use in your  
investigation a logic mind from scientist cartesian one or new research  
about non cartesian systems. It's very important before send you references  
about "Emission de formes", "Champ vital", etc...

Meanwhile an answer from you

Joachim Fernandez/Nitav.

P.S.: Do you work on the "Kirlian effect".

About IIDBR, you read not the good information, it's IIBR, yourself,  
because Ravatin think that you send an information which be read  
at your name.
